

The Baby Banquet

making feeding times easier

Introducing Stress-Free Mealtimes!

The Best New Innovation in Early Childhood Feeding is Finally Here.

The Baby Banquet was created to give parents and caregivers an easier way to feed young children.

At home or out in the world feeding time becomes cleaner, faster and more convenient with the Baby Banquet feeding system!

Los Angeles, CA- August 25, 2008 - Every new parent knows this scene: A colorful medley of sticky goo is coating all nearby surfaces. The parent, baby and perhaps even the dog are blanketed in the cuisine that was intended to fill the stomach of the now screaming, frustrated child. And the dog doesn't want strained carrots either.

Stress and exasperation are too often the hallmarks of the early life feeding experience. Unfortunately this can lead to undernourishment, confusion and negative feelings toward food on the part of the child. Luckily, things have changed!!

Feeding time can be a more comfortable, clean and organized process!

When John and Liz Meuser were new parents they realized there had to be a better way. What if, they wondered, the foods or jars of food were conveniently contained in one device that the parent could comfortably maneuver for maximum ease and utility? Their answer is the Baby Banquet, a new and welcome innovation in meal time adventures. Now parents can use one solid decanter to easily serve a balanced meal in a clean, simplified and relaxed way.

When traveling, the Baby Banquet has the added benefit of providing extra storage space that's the perfect size for juice boxes, nutritious bars or feeding implements. At home, the park or on the road it's now a breeze to offer babies and toddlers diverse, nourishing meals without mess, stress or confusion.

Food Attitudes to Grow On

When the mood of mealtimes is a tense apprehension the young child learns to approach food with caution, anxiety and fear. Alternatively, when a parent or caregiver is empowered to comfortably serve a balanced and wholesome meal the tension levels are reduced and mealtimes become sources of pleasure, fun and joy. These are the feelings that can set the tone for a lifetime of healthy, harmonious relationships with food.

Every parent is concerned with safety as well as balanced nutrition and the makers of the Baby Banquet feeding system are proud to say their product is BPA free. "BPA free" means it's free of the chemical called Bisphenol-A (BPA). Plastics made with BPA have recently become a concern because of the possibility of the chemical leaching into liquids and effecting human hormones. The Baby Banquet offers a safe and durable alternative that allows parents the peace of mind of avoiding these risks. The inner insert is also machine washable.

As a child grows their feeding needs change. The Baby Banquet grows with him or her by working as well with the requirements of a baby's mealtimes as with a toddler's. For babies jars of baby food can be stored in the base and served from the convenient insert. Toddlers can find their favorite juice boxes, bars or snacks inside and also serve themselves from the insert's compartments.

The Baby Banquet presents one of the best gifts for an expecting couple. One of the most successful methods of supporting new parents is to empower them with the tools to make learning to parent as convenient and smooth as possible. The Baby Banquet is a terrific way to enhance the confidence new parents need to grow.
